This document is a very brief reflection about my studies so far in UoM.

1 COMP10121

COMP10121 is about learning the basics for academic practice.

1.1 Things I like

1. It's somewhat useful.
2. It's fun to work together with my team.
3. It's different (not exact sciences).

1.2 Things I dislike

1. Reading.
2. Sometimes it feels useless.
3. That I have to write 3 things I dislike when I can't think of a third thing.

2 COMP11120

COMP11120 is basic maths for use in computer science later on.

2.1 Things I like

1. I like maths in general.
2. It's a bit difficult.
3. I'm good at it.

2.2 Things I dislike

1. The very long proofs.
2. Examples classes because it can take up to an hour for 5 minutes of checking.
3. Heavy booklet.

3 COMP12111

COMP12111 is about the actual mechanical part of computers and circuits.

3.1 Things I like

1. Really interesting to see physical schematics come to life.
2. I'm good at it.
3. The lecturer's accent.

3.2 Things I dislike

1. That It's almost impossible to do lab-work remotely.
2. Always afraid of locking files.
3. The lab-manuals sometimes are not fully understandable.

4 COMP15111

COMP15111 is one level higher than COMP121. It's still pretty low level but it's not physical anymore.

4.1 Things I like

1. Learning assembly, it's useful later on in programming and debugging.
2. The lecturer's smile and attitude.
3. Provides some interesting facts.

4.2 Things I dislike

1. Again, tedious to do lab-work remotely.
- 2.
- 3.

5 COMP16121

COMP16121 is about OOP in Java.

5.1 Things I like

1. It's useful.
2. It's programming.
3. It's easy to learn.

5.2 Things I dislike

1. The bloody physical lab-book.
2. A bit slow.
3. One exercise where you have to type out 27 almost identical lines.
